DEC CPWG Site Update

Hoosick Area Investigations

April 25, 2023

Site Updates

- McCaffrey Street
 - OU1 Supplemental Remedial Investigation work is well underway.
 - OU1 Human health and Ecological risk assessments are substantially complete.
 - BERA was submitted in November, and comments were returned in early April.
 - Additional statistical analysis was recommended and work plan is in progress as part of the BHHRA
 - OU2 Remedial Design Work Plan and Geotech Investigation Report have been submitted and are in review.
 - OU3 remedial investigation scope has been submitted and is in review.

Site Updates

- Liberty Street
 - Interim remedial measure on the stormwater drainage system is substantially complete, and a construction completion report is being prepared.
 - Additional surface water characterization work was approved last year, and that data has been collected and is being compiled.

Site Updates

- Former Columbia Corporation
 - Revised Site Characterization Report is complete and is available online.
- 80 First Street
 - Topsoil cover is in place and seeding is complete and vegetative cover is established.
 - The draft Final Engineering Report (FER), draft Site Management Plan (SMP) and the draft Environmental Easement package are under review.
- Hoosick Falls Landfill
 - A draft Remedial Investigation (RI) Report has been submitted and is under review
 - Leachate IRMs are ongoing

Site Updates

- River Road
 - Site is reclassified to a Class 2 for continued work due to a significant source of contamination encountered in bedrock.
 - The Bedrock Groundwater IRM pre-design investigation (PDI) work is complete.
 - The PDI Tech Memorandum and the Remedial Investigation Report have been submitted and are in the process of being finalized.
